Here are three elements in the Wildlife Conservation and Anti-Trafficking Act that make it a powerful piece of legislation.

1. **STRENGTHENS WILDLIFE CRIME DETECTION**
   Mandates whistleblower rewards for citizens and NGOs worldwide who report information on wildlife crime, with a successful prosecution.

2. **ENHANCES ENFORCEMENT MECHANISMS**
   Expands transnational law enforcement to stop wildlife trafficking at the source. Wildlife trafficking becomes an offense under federal racketeering and organized crime statutes.

3. **INCREASES WILDLIFE CONSERVATION FUNDING**
   Monies recovered by successful prosecution under said statutes and other wildlife protection laws must be put directly into conservation efforts.
